

2023 Michigan Peak Fall Color Map Predictions

Manistique continues to be unique as summer comes to a close. Come in September to experience warm summer days, cooler evenings, and the joy of discovering beautiful trails where fall colors are starting to appear.

What makes Manistique so unique?

Manistique Boardwalk and River Walk is often listed as an underrated, must see place in Michigan. This beautiful, pleasant walk offers views of the lighthouse and town of Manistique.

A free raft ride within the Palms Brook State Park glides over one of Michigan's alluring natural attractions, Kitch-iti-kipi, The Big Spring. It is 40 feet deep with more than 10,000 gallons of crystal clear water that gushes from the fissures in the underlying limestone. Kind passengers volunteer to pull the raft over the spring so you can view trout and other fish that call the spring home.

September is special in the Manistique area as it is prime time for hiking. Well marked trails can be found in the Indian Lake State Park, Rainey Wildlife Area, Hiawatha National Forest with multiple trails, and more. At your own pace enjoy the uncrowded pathways, crisp air and rustling leaves. (Next newsletter will highlight day trips to drive while making centrally located Manistique your base).

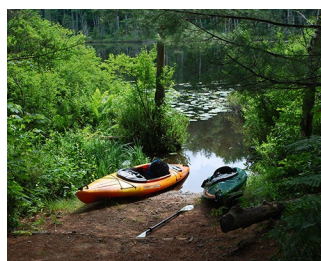

In every walk with nature one receives more than he seeks. – John Muir
